## **AQUA DIAGNOSTIC'S PRODUCT LAUNCH A SUCCESS**

### **International Distributors Primed to Sell and Support**

Aqua Diagnostic's International Distributor Meeting October 21 – October 24 2008 at Cape Panwa, Phuket, Thailand successfully launched the PeCOD™ COD analyser range across Asia. According to CEO, Dr Roger Knight, 'This was a major milestone in establishing Aqua Diagnostic as a key player in the international water instrumentation market. With ten new agents across the region, customers gain access to a new way to measure COD, where the products' benefits clearly address the long standing issues of traditional methods.'

Global distributors from the UK, South Africa, South Korea, China, Hong Kong, Taiwan, Malaysia and Thailand attended the meeting, receiving specialist product and customer support training. 'At last a green real-time COD analyser capable of measuring in a range of samples; clean water to industrial water to seawater,' said one distributor.

For the wastewater industry and for industries meeting environmental regulations for water discharge, the PeCOD™ COD analysers save time and reduce costs. The fast analysis (minutes) gives instant accurate COD readings, with direct correlation to BOD.

**Versatile- Freshwater to Wastewater to Seawater**

**Fast- COD in minutes**

**BOD and COD**

**Saves money- effective process management**

**Accurate-when results matter**

PeCOD™ COD (Chemical Oxygen Demand) analysers are available in three different models purpose designed for **Laboratory** use, **Field Portable** analysis, and **Online COD** monitoring. All systems incorporate the same core COD analysis module to ensure identical performance between models.
